STEAM GENERATORS

Cleopatra's professional steam generators are based on the electrode principle and are used in many gyms, hotels, spas, etc. worldwide. With this steam generator, you can count on an excellent steam process, a long service life and easy maintenance. Exploded views and spare parts of these generators are available (see page 48).

FEATURES

- Stainless steel housing
- Easy to use Easy to
- maintain
- Error message via LED or display
- From 4 kg/h up to 45 kg/h
- Optional: Ultrasteam, LED lighting, Clean Aqua, Climate Control, Turbo steam, Touch display, Sofware Cleo App., Bluetooth music.

CLEO BASIC PRO

The Cleo Basic ^{pro} is is a professional generator used in many gyms, hotels, spas, etc. With this steam generator, you can count on an excellent steaming process, a long service life and easy maintenance.

FEATURES

- Stainless steel housing
- Easy to use Easy to
- maintain
- Error message via LED or
- display From 4 kg/h up to 45

BASIC

- Steam on/off
- Fragrance dosage on/off
- Temperature setting (via potentiometer)
- Manual draining

DESCRIPTION	ARTICLE NO	VOLTAGE	POWER

CLEO VITAL PRO

The Cleo Vital ᵖʳᵒ, the successor to the Cleo Basic ᵖʳᵒ, is a professional generator with almost the same components as the Cleo Basic but with a new controller and options. Through this new control, maintenance and adjustment of settings have become easier. The Vital Pro generator can also be equipped with an external touch panel (page 34). With this steam generator, you can count on an excellent steam process, a long service life and easy maintenance.

FEATURES

- Stainless steel housing
- Easy to use
- Low-maintenance
- Fault indication LED

BASIC

- Steam on/off
- Fragrance dosage on/off
- Lighting on/off
- Temperature setting (via potentiometer)
- Manual draining

OPTIO

- External touch panel (page 34)
- Institution management software
- Press for steam - Standy function
- Multi fragrance
- Clean Aqua System (CAS)
- Climate control
- Turbo Steam
- UltraSteam
- Bluetooth Sound module
- Control via Modbus / KNX

ULTRASTEAM

DENSE CLOUDS OF STEAM

The Ultrasteam generator was conceived and designed to achieve the ultimate steam experience: thick clouds of steam and a wonderful temperature of around 48 degrees Celsius. The Utlrasteam technology temporarily lowers the temperature but increases humidity. This keeps the steaming process naturally balanced.

The Ultrasteam generator can cooperate with various Cleopatra steam generators, making it also possible to connect the Ultrasteam to existing installations.

SAVE ENERGY

For hotels, public swimming pools and public facilities, it is possible to save significantly on energy costs. The Ultrasteam and Cleopatra steam generators can be tuned to provide a short
heating time and full clouds of steam are created. This eliminates the need to run the plant all day. This saves maintenance and energy costs.

TECHNICAL SPECIFICATIONS

- 1 x 230V
- Cold water connection

DESCRIPTION	ARTICLE NO	VOLTAGE
Ultrasteam ST-A (stand alone) with push button and LED (red, orange and green)	2500 60 10	1 x 230 V
Ultrasteam (RS 485 version)	2500 60 20	1 x 230V

OPERATION OF THE ULTRASTEAM IN 4 IMAGES
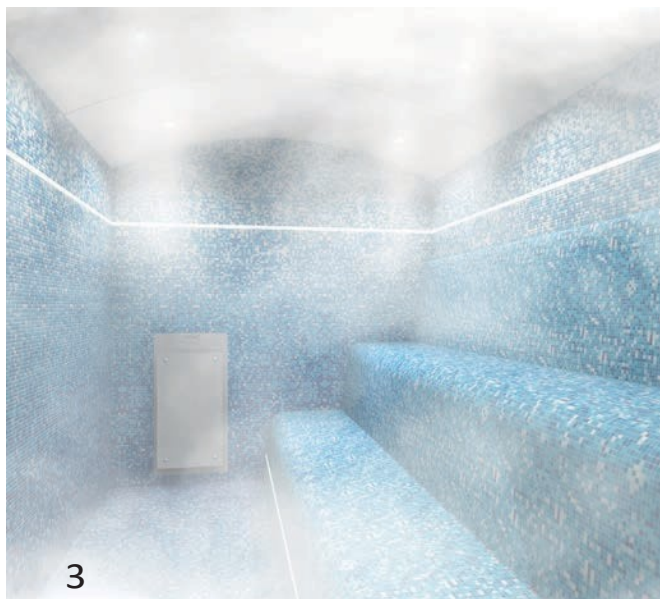

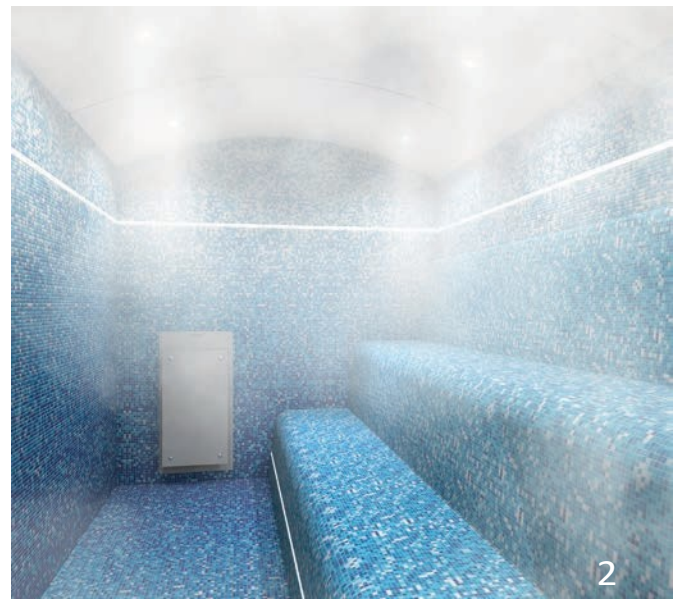

CLIMATE CONTROL

The climate in a steam bath is different in almost every situation; it depends not only on the size of the cabin but also on the humidity and temperature in the room. To create an optimal steam bath, the options below can be a good addition.

Turbo steam

Cold air is added to the steam to assist the steaming process. This increases condensation in the steam bath, creating a pleasant climate. Also, the steam is blown further into the cabin.

Climate control

If the temperature in the steam bath quickly rises to the set maximum temperature, the generator switches off, which may cause an irregular steaming process. The Climate Control switches on above the set temperature and, by means of a fan, causes the temperature to drop below the desired temperature. This will cause the steam generator to switch on earlier and once again bring steam into the cabin.

UltraSteam

When steam baths are used continuously and the condensation point is raised, you get less visible steam in the cabin. The Ultrasteam generator blows cold mist into the cabin, lowering the condensation point, resulting in thick clouds of steam. Besides this effect, using the Ultrasteam also temporarily lowers the temperature in the cabin, allowing new steam to enter the cabin quickly.

Also ideal in combination with the Press for Steam function; to create a steam bath full of pleasant clouds of steam at the right temperature in no time.

HYGIENE

Clean Aqua System (CAS)

The Clean Aqua system ensures that the seats in the steam bath are rinsed with water via a nozzle. The cabin is then ready for the next user. After a certain set time period, the system is activated automatically.

FRAGRANCE DOSAGE

Multi fragrance module

Besides the single fragrance module, it is also possible to apply a multi-odour module. If fragrance needs to be changed frequently, this is an easy-to-operate option (up to 3 fragrances). Easy to set via the external control panel, intensity and fragrance choice.

SAVE ENERGY

Press for Steam

If the steam bath needs to be switched on and off at irregular times, the Press for Steam is an indeal solution. The steam generator remains on standby at a base temperature, pressing a button outside the cabin brings the generator out of standby and starts steam production immediately. Ideal for hotels and places where visitor numbers fluctuate. Besides energy consumption, this also saves in generator maintenance. More information page 62.

MUSIC

Bluetooth module

Besides the possibility of installing speakers in a steam bath, it is also possible to play music via a Bluetooth module. Simply connect via a phone or tablet and enjoy your favourite music.

CONTROL VIA EXTRENAL SOURCE

KNX home automation module

With the new generation of steam generators, the Cleo Vital pro and the Cleo Elite pro, it is possible to control the generator via home automation, KNX. Ask about the possibilities.

Signal 4-20 mA / 0-10 V

With the new generation of steam generators, the Cleo Vital pro and the Cleo Elite pro, it is possible to control the generator via 4-20 mA / 0-10V signal. Ask about the possibilities.

WATER QUALITY

WATER QUALITY

For proper operation of the electrode generators, it is important that there is sufficient conductivity in the water (measured in micro siemens / cm). The use of filters and softeners can strongly influence the conductivity and thus the steaming process. If in doubt, we recommend measuring the water with the measuring equipment available on the market for this purpose.

Recommended water conductivity: 125 - 1250 micro Siemens / cm (salinity) Water

hardness: 7 - 14 ^{oDH} or 1.3 - 2.5 mmol / l

DRAIN

Use 'pressure PVC' for the first 2 metres because of temperatures up to 100 ^{oC}.

ARCHITECTURAL CABINS

For architectural cabins, always specify a minimum ambient temperature of 20 degrees ^{oC}. It is recommended to provide architectural cabins with insulation panels. In addition, good ventilation is extremely important for the steaming process.

WELLNESS AUTOMATION

Wellness automation with the Master Controller Pro

You can fully automate the steaming process with the Master Controller Pro (MCP). It automates the entire steaming process according to a number of easily adjustable steps in accordance with the customer's wishes. Software-wise, with the Cleopatra app (windows), the following values can be set customer-specifically to create the optimum experience:

Steam function:
- Steam time setting
- Temperature setting
- Warm-up function for jump-starting

Climate control:
- For stable temperature in the cabin
- Adjustable 40 - 50 oC
- On / off

Lighting:
- Connection 4 x 4 Watt LED white (standard)
- Cleo RGB LED spot module (via RS 485) - jumper setting for white LED display
- Cleo RGB LED track module (via RS 485) - jumper setting for white LED display

Special features:
- Shower function end of steam session
- Clean Aqua System: for rinsing banks after steaming session
- Cleo Bluetooth audio module (only with Cleo Steambrain [pro])
- Time Schedular (real time): controls on/off times 7 days a week, up to 3 time slots per day adjustable

Fragrance:
- Cleo fragrance controller 1 pump or (in combination with Touch control Deluxe up to 4 pumps with emptying function

Ultrasteam:
- Ultrasteam provides a true unbeatable steam sensation: thick clouds of steam!

Operating options:
- Press for steam operation (push button + LED indication red/green)
- Coin mechanism
- Nayax payment terminal and telemetry

Status indication:
- The status indication reads off how long the system has been in operation and how many times it has been switched on. The set process can be followed closely and error messages are displayed via codes.

108   Steam inlet glass RAL 7021

ONYX PAYMENT TERMINAL & TELEMETRY

With the Onyx, you have a payment terminal that accepts a wide range of payment methods such as contactless bank cards, credit cards, Apple Pay, NFC and mobile payment apps, WeChat Pay, Alipay and prepaid cards. Thanks to integrated telemetry, you as an operator can easily monitor and manage with the back office system. You can remotely update prices and change product names.

Specifications

- Contactless/cashless payments
- Easy navigation with colour touchscreen, graphics and text
- Works with all well-known local payment providers
- NFC and mobile payment apps
- Contactless card reader and telemetry device in one compact device

Telemeterie

- 1 PIN contract for all bank cards, credit cards, Apple Pay etc. (need not be concluded separately)
- Adjusting prices remotely
- Extensive analysis tools
- Terminal updates
- App for smartphone or tablet
- Synchronised with desktop management system

ENERGY SAVINGS

It is one of the most important challenges of our time; saving energy. Allowing the customer to enjoy a soothing steam bath to the full but only allowing the steam bath to function when needed. To achieve this, Cleopatra has developed a number of savings options.

With the Cleopatra Standby and pre-heat function, you save on energy costs without having to compromise on comfort and quality of the steaming process.

- Press for steam: standby control that keeps the steam generator at temperature and produces steam immediately after activation by the end user.
- Ultrasteam: a complement to press for steam if the steam image (thick clouds of steam) needs to be achieved in a very short time.

FIGURE 1 TRADITIONAL CONTINUOUS STEAM PROCESS

kW hrs

A   B

t
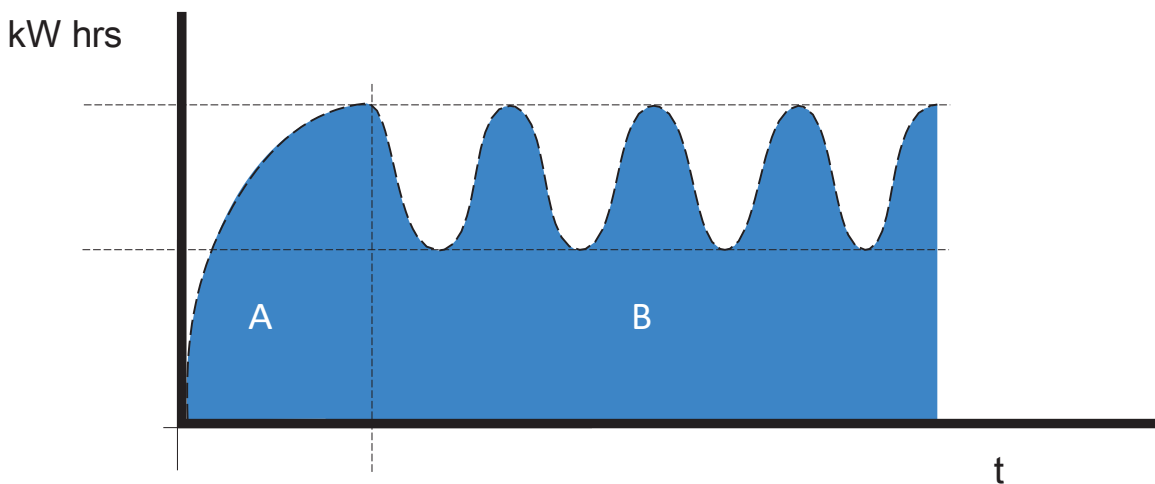

FIGURE 1

A. When the steam generator is switched on, it will start heating until the set temperature is reached. After this phase, the generator will continue to heat up as soon as the temperature drops a few degrees Celsius.

B. The generator requires less power (kW hours) to maintain the desired temperature in the cabin.

* kW hrs = consumption (kW) per hour

FIGURE 2 STANDBY FUNCTION

A. When the steam generator is switched on, it starts to heat up via the preheat function (=preheating phase).

B. This area in Figure 2 (under B) is the minimum energy required to keep the generator at temperature. On activation by the end user, the steam process starts immediately.

C. Initiated start by steam room user

To support the steam process, an ultrasteam generator can be fitted (page 44). The ultrasteam creates a steam bath at temperature with thick clouds of dense steam.
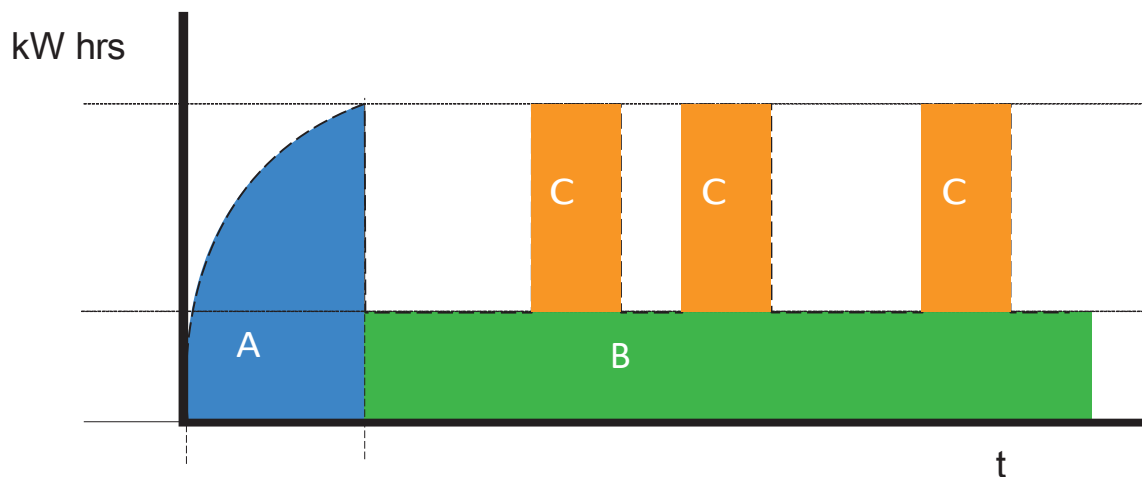

ENERGY SAVING EXAMPLE

Steam generator with an output of 11.4 kW runs 16 hours a day - 7 days a week

Total kW per year = 11.4 x 16 x 7 x 52 = 66,393 kWh (x 55% average consumption after start-up (Figure 1-B) = 36,516 kWh

With Cleopatra savings system (figure 2-B): Max consumption 66,393 kWh x 30% = 19,918 kWh

Difference: 36,516 -/- 19,918 = 16,598 kWh (this is the saving 45% in this example)

Savings obviously depend on a number of factors: number of users, duration of the steam session, power of the generator. The calculation is for illustrative purposes only.

Cleopatra

Cleopatra has been the Dutch manufacturer of luxury and high-quality wellness products since 1966. Our range consists of steam/shower cabins, customised steam solutions, baths, whirlpools, saunas, infrared cabins and spas. We serve both the consumer and the professional market. The most important source of inspiration for Cleopatra is water, whereby the consumer's need for relaxation comes first. In order to guarantee quality, all our products are manufactured in-house by professionals. In addition, we subject all manufactured products to an extensive and thorough quality test. With our passion for the product and years of experience, we guarantee the highest quality and durability of all Cleopatra products.

Showroom

To get a good impression of our products, a visit to our showroom and Wellness Experience Centre in Zaandam is highly recommended. Most of our range is conveniently presented here. Our experienced staff will be happy to advise you.

Wellness Experience Centre

Try out wellness products for the bathroom yourself. Shower, steam, sauna, infrared or bath, doesn't matter. Know the feel of the sparkling water, the beauty of the flowing design, the invigorating scents of the steam room and the massaging power of the latest whirlpool system.

Customised advice

To receive sound advice, we also offer you the possibility of a Cleopatra wellness advisor working with you in your home to look at the options for the ideal interpretation of your wellness space, you can contact the inside sales department to make a consultation appointment.
