BATHING IN TOP SHAPE

We see the bathroom as the power plant for the house's occupants, where each resident refreshes and new energy.

We offer a suitable solution for every bathroom!

- Deep baths and large range of bath shapes.
- Ergonomically shaped.
- Of the highest quality.
- Bubble baths, massage baths and full-body massage baths.

All baths and whirlpools are made of sanitary acrylic. This unique, scratch-resistant plastic is colourfast, hygienic and especially skin-friendly. Acrylic also has excellent non-slip properties and is easy to clean. The high insulation value of acrylic ensures that the bath water does not cool down quickly.

Cleopatra's whirlpool systems give you complete freedom. At no extra cost, you can, for example, decide where the control panel, pump and/or blower should be placed. Extremely practical in terms of installation.

The location and numbers of air and hydro jets are precisely tailored to bath shape and bath size. However, if you want more jets or jets in a different place, we will be happy to customise a whirlpool.

Cleopatra's patented systems are equipped with the necessary features to keep the bath clean and hygienic. For instance, the jets and the connections are constructed so that the water flows out optimally. In addition, the CleoClean system ensures that the systems from the massage line are blown out.

Cleopatra baths and whirlpools offer the possibility of installing the built-in parts in various Special finishes can be supplied. Ask about the possibilities or visit our online special finish configurator.

Cleopatra's has enjoyed the trust of many professional institutions for many years. You will find our baths and whirlpools at Center Parcs, among others, Mercure hotels, Golden Tulip, Amsterdam Arena, Hotel TwentySeven, numerous public saunas, sports institutes, sports funds and municipal swimming pools.

Cleopatra has been the great innovator for many years in the field of bath pleasure. We do not limit ourselves to bathtubs and whirlpools. Our saunas, Aquafun shower steam rooms and steam baths are leading in terms of technology, design and features.

Whether it is a built-in bath, a freestanding bath or an elaborate massage bath. At Cleopatra, we have been making wellness products since 1966; let us surprise you with the various possibilities!

BATH LINES

PREMIUM LINE

Relaxed bathing! That was the starting point when developing the baths in the Premium Line. On average, they are deeper than 'Regular' baths and even the smallest baths offer enormous space and fit into any interior.

LUXUS LINE

Unique: deep & ergonomic! The shape of the Luxus Line models allow you to immerse your entire body in warm water dipping. The human body was at the centre of the design. Experience this unique comfort as if you were lying in a recliner or sun lounger. The baths in the luxus line series were designed by Van Berlo Studios.

FREESTANDING BATHS

Exclusive freestanding acrylic bathtubs in various unique designs. Easy to install in almost any bathroom or wellness area.

WELLPOOL LINE

Clear lines and shapes without compromising on comfort! The result is a contemporary line, seven sizes and four shapes, each with its own character. The baths of the WellPool series were designed by top designer Robert Bronwasser.

In case of physical complaints, always consult your doctor before using a bath, whirlpool, sauna or any of our other wellness products.

WELLPOOL LINE

The baths in the Wellpool range are the result of contemporary lines, seven sizes and four shapes, each with its own character. The Wellpool baths are designed by top designer Robert Bronwasser.

FEATURES

- Bath made of 5 mm thick acrylic reinforced with polyester.
- Colour visible parts & taps standard chrome.
- Depth 510 mm.
- Dimension drawings page 14.

OPTIONAL (page 67)

- Axor bath tub rim combination (taps).
- LED colour lighting (2 pieces).
- Overflow/empty combination.
- Overflow/empty/inflow combination.
- Hydro-heating.
- Colour parts in special finish.
- Whirlpool system.

ACCESSORIES

- Handle.
- Neck pillow.
- Bath oils.

Loose bath

- Bathtub set included
- Exclusive overflow/empty combination
- Exclusive whirlpool system

WellPool Lounge 450

1800 x 850 x 500 mm

The Lounge variant has 2 different back sides in addition to 4 integrated armrests:

- A 'passive' bevel for pure relaxation
- And an 'active' side to sit up a bit more straight

Complete comfort by:

- Large base size (1340 mm)
- Four armrests
- Two different back sides

WHIRLPOOLS WELLPOOL

Hydro	8300 10 80		
Spa/Hydro	8300 10 90		

Colour of the visible parts is chrome as standard.
For special finishes, see page 70.

SPA SYSTEM

Here, air is blown into the bath from the bottom, not straight up but parallel to the bath bottom for even more massage effect. The result is a continuous flow of many thousands of sparkling, large and small bubbles massaging the surface of the skin.

HYDRO SYSTEM

The pretty little jets in the bath wall are the hydro(water) jets, which provide a water jet that has a powerful and massaging effect on your back, legs and feet. Using the controls, the pulsation and power can be regulated (harder or softer).

COMBI SYSTEM (SPA/HYDRO)

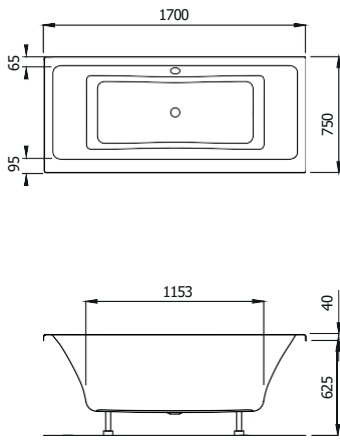

The combi system cleverly combines the powerful water jets from the bath wall with the bubble effect of the thousands of large and small air bubbles from the bottom. But if you wish, you can also switch off either!

THE POWER OF ERGONOMICS

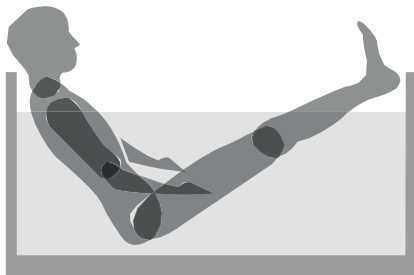

Scenario 1

Traditional flat-bottom pool is too small and shallow; sinking under means knees above water.

Scenario 2

Traditional flat-bottom pool is shallow, allowing the upper body to rise above the water if the legs are submerged.

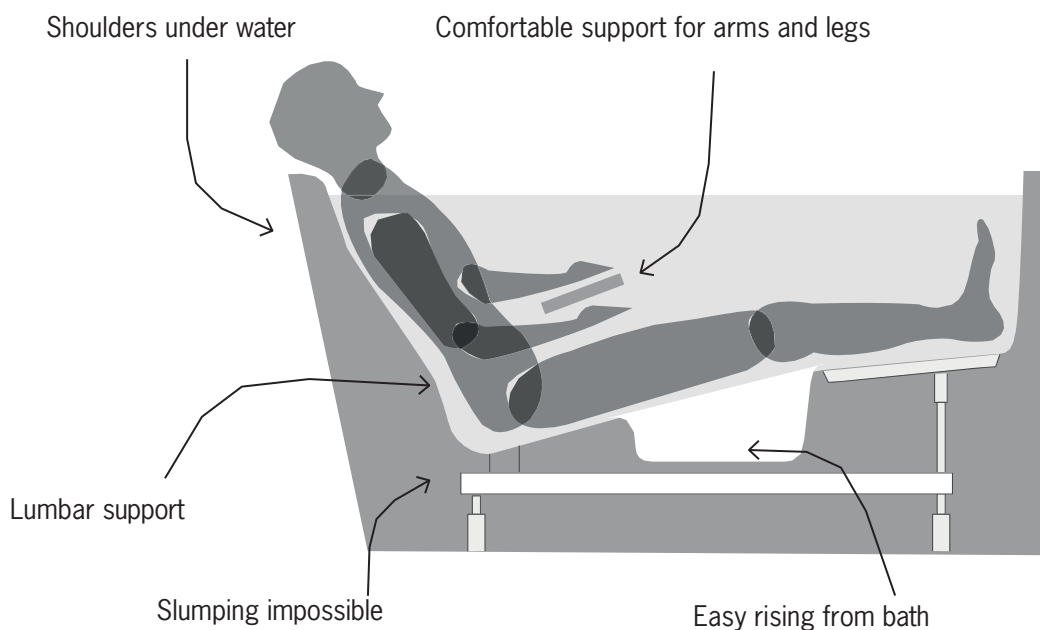

Scenario 3

Traditional flat-bottom pool is too big and shallow, this tends to make people sink out from under and float.

Ergonomic bath

In an ergonomic bathtub, the body is sufficiently supported to fully relax. Do not compromise on your wellness experience and so go for an ergonomic bath by Cleopatra!

LUXUS LINE SOLO

Submerged up to your neck without cold knees. The Luxus line Solo models are extremely popular due to their depth of 600 mm.

FEATURES

- Bath made of 5 mm thick acrylic reinforced with polyester.
- Colour visible parts & taps standard chrome.
- Depth 600 mm.
- Dimension drawings see page 40.

OPTIONAL (page 67)

- Axor bath tub rim combination (mixer set).
- LED colour lighting (2 pieces).
- Overflow/empty/inflow combination.
- Hydro-heating.
- Colour parts in Special finish.

ACCESSORIES

- Handle.
- Neck pillow.
- Bath oils.

The combi system cleverly combines the powerful water jets from the bath wall with the bubble effect of the thousands of large and small air bubbles from the bottom. But if you wish, you can also switch off either!

FULL BODY MASSAGE

Unique system developed by Cleopatra for the demanding user looking for a full-body massage. The water jets are placed not only in the side wall but also in the bottom - creating a wonderful massage that can be adjusted in power.

THE VITAL EFFECT OF A CLEOPATRA WHIRLPOOL

You probably know the stories about Cleopatra taking a daily donkey milk bath because it would keep her young and healthy forever. Bathing has been around for centuries and recurs in different cultures where relaxing, well-being and health are key.

The effects of bathing:

- Research on the psychological effect of taking a bath found that bathing makes you produce the happiness hormone serotonin. In addition, the warm water was found to take away stress and thus lead to more relaxation.
- Research from Radboud UMC attributes the relaxed feeling to the effect of warm water on your body. This is because it causes the blood vessels in your skin to dilate. This increases your heart rate and energy, without you having to exert yourself. You burn more calories taking a bath than lying on the couch, for example.

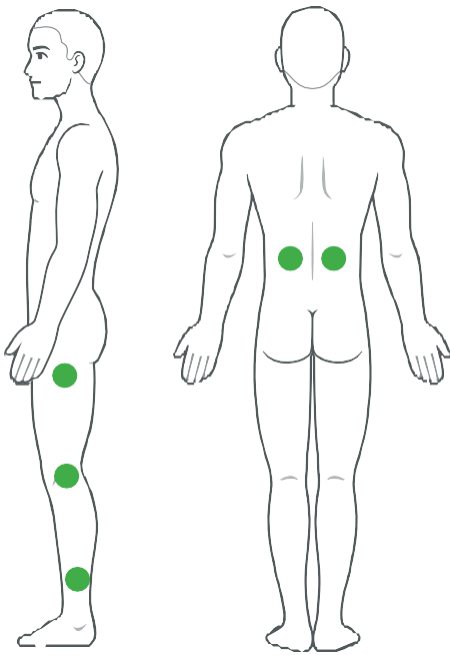

Benefits of a hot bath and/or whirlpool:

- **Burning calories** in a hot bath. As the body's core temperature rises, so does its metabolism.
- **Relieve muscle pain:** a hot bath relieves muscle pain and a whirlpool massages muscles for faster recovery after exercise.
- **A good night's sleep:** body temperature rises while taking a bath. This means that one must cool down again after taking a bath. This cooling process also happens before one goes to sleep. In short, cooling down triggers the brain to relax.
- **Better circulation:** warm temperatures cause your blood vessels to open wider. This not only promotes sleep, but also blood circulation in the body. The warm temperature also makes you sweat faster which has a purifying effect. Make sure to replenish the lost fluids: drink plenty of water.
- **Reducing stress and tension:** delightful massage with the possible addition of essential oils stimulates the senses.
-

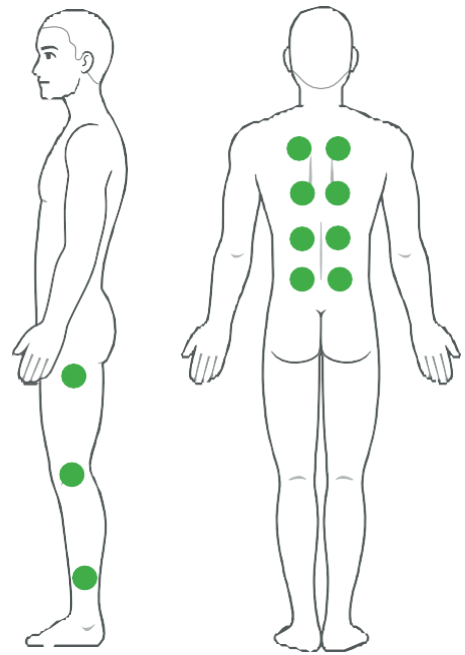

In case of health complaints, always consult your GP before bathing.

Every whirlpool system in our range provides relaxation and massage. Of course, the effects of this massage depend strongly on the system used: air from the bottom for a tingling soft massage, hydro from the bath wall and bottom for a powerful effective point massage.

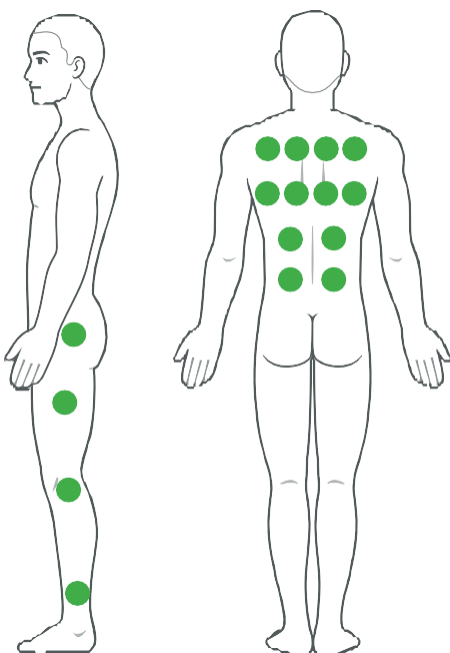

MASSAGE POINTS PER WHIRLPOOL SYSTEM

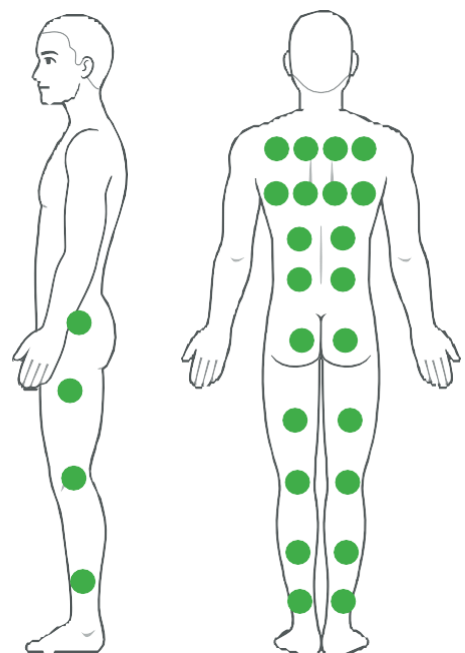

COMFORT WHIRLPOOL

RELAX WHIRLPOOL

MASSAGE WHIRLPOOL

FULL BODY MASSAGE WHIRLPOOL

COMFORT WHIRLPOOLS

The Comfort line whirlpools are high-quality massage baths that do not skimp on quality. Via the Poolmaster One control, you can easily switch the system on and off and reduce the force of water or air in no time.

The systems are equipped with a number of basic functions as standard and can be expanded with options and accessories (depending on system and bath type). The systems can also be finished in special finishes.

SPA SYSTEM

Here, air is blown into the bath from the bottom, not straight up but parallel to the bath bottom for even more massage effect. The result is a continuous flow of many thousands of bubbles, sparkling, large and small, massaging the body.

HYDRO SYSTEM

The pretty little jets in the side wall are the hydro(water) jets, which provide a water jet that has a powerful and massaging effect on your back, legs and feet. You can adjust the power (harder or softer) using the controls.

COMBI SYSTEM (SPA/HYDRO)

The combi system cleverly combines the powerful water jets from the side with the bubble effect of the thousands of large and small bubbles from the bottom. But if you wish, you can also switch off either!

MASSAGE WHIRLPOOLS

The Massage whirlpool systems are unrivalled in terms of performance and functionality. The systems are easy to operate via the digital display and each system allows infinitely variable power adjustment or pulsing.

The hydro and spa/hydro system also includes the Superwhirl® function and afterblow of all jets (Cleo Clean) for optimum hygiene as standard. If you wish to further decorate the bath with Bluetooth music, colour lighting and heating, this is possible. It is also possible to finish the colour parts with special finishes.

SPA SYSTEM

Here, air is blown into the bath from the bottom, not straight up but parallel to the bath bottom for even more massage effect. The result is a continuous flow of many thousands of sparkling, large and small air bubbles massaging the surface of the skin.

COMBI SYSTEM (SPA/HYDRO)

The combi system cleverly combines the powerful water jets from the bath wall with the bubble effect of the thousands of large and small air bubbles from the bottom. But if you wish, you can also switch off either!

SUPERWHIRL®

The Superwhirl® function has been developed for the discerning user. When switched on via the display, the hydro pump and air blower are switched on simultaneously, blowing all the air from the blower directly into the venturi of the water jets. This creates a very powerful water jet that provides a good hard massage.

If desired, the Superwhirl® function can be turned up and down or pulsed via the display.

FULL BODY MASSAGE WHIRLPOOL

Combi jets (air + water jets) in the bath bottom send tantalising bubbles and/or massaging water jets to the whole body. Back, feet, legs and hips are massaged from the back, feet and sides with active water jets. You can adjust the rhythm and strength of the hydro jets (water jets) and of the spa jets (bubbles). You can also adjust the strength of the massages in adjust the back, so you can, for example, get a light massage in the back while the legs and feet are vigorously addressed. With this system, you have a very wide range of treatments at your disposal; from gentle relaxing massage to very active treatments all over the body. As standard, this system is equipped with Superwhirl, CleoClean and 2 hydro pumps.

SPA SYSTEM

Here, air is blown into the bath from the bottom, not straight up but parallel to the bath bottom for even more massage effect. The result is a continuous flow of many thousands of sparkling, large and small air bubbles massaging the surface of the skin.

HYDRO SYSTEM

SUPERWHIRL®

The Superwhirl® function has been developed for the discerning user. When switched on via the display, the hydro pump and air blower are turned on simultaneously, blowing all the air from the blower directly into the venturi of the water jets. This creates a very powerful water jet that provides a good hard massage. If desired, the Superwhirl® function can be turned up and down or pulsed via the display.

Superwhirl® is standard with Massage systems (hydro, spa/hydro) and Full body massage.

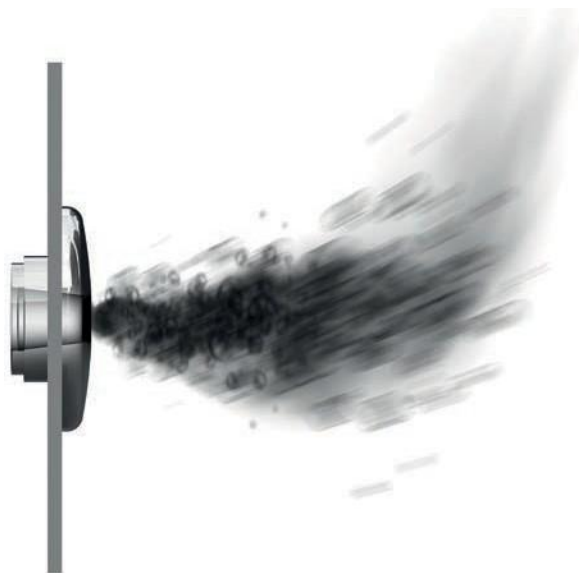

CLEOCLEAN

A clean whirlpool system is a good start for your next bath. Rinsing the system regularly with a Cleopatra cleaner is a good way to ensure years of bathing pleasure. To ensure that the pipes are blown through after use, we introduce Cleo Clean. After the bath, both the air pipes of the Spa system and the pipes of the hydro system are blown through. This ensures that residual water is also blown out of the water jets. In short, the ideal way to maintain your system.

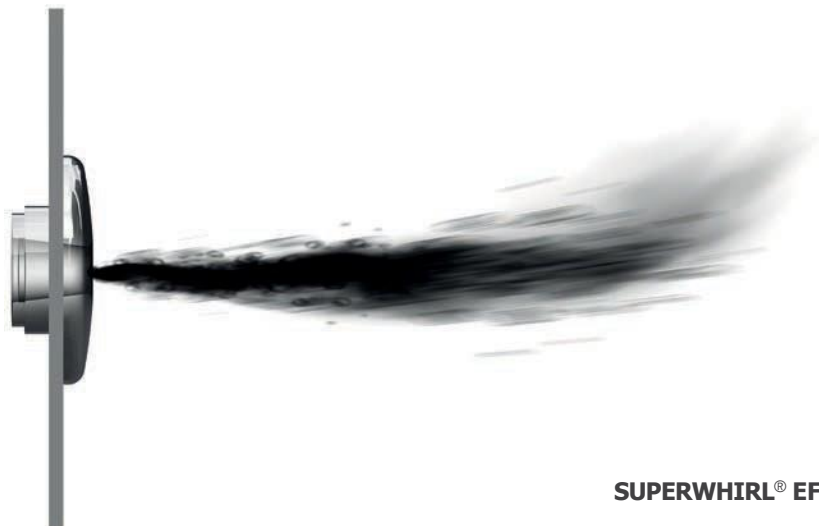

CleoClean is standard with Massage systems (hydro, spa/hydro) and Full body massage.

SPA EFFECT

HYDRO EFFECT

SUPERWHIRL® EFFECT

OXYNATION ⁰² - OXYGEN BATH

Large amount of very fine air bubbles are sent into the bathtub from two points. The bath water turns milky white because of the millions of very tiny air bubbles. Your skin is pampered with a very large dose of oxygen. The result is the intensive cleansing and regeneration of the skin and the acquisition of new energy. A treat for body and mind.

So why does oxygen work to make our skin softer and softer? The theory behind oxygenated beauty is that we all need oxygen to survive. Oxygen is what revives and replenishes the cells in our body. However, the pollutants in our environment have greatly reduced our oxygen levels. It is also a fact that as we age, oxygen does not reach our skin cells as efficiently, leading to the ageing process.

If you want beautiful, glowing, clear skin, you need an ⁰² experience. A 20-minute bath cycle in our oxygen-enriched bath is enough for a wellness treatment like no other.

OXYNATION 02

Separate system built into a bath or to be combined with Massage whirlpool systems.

OPERATION:

Poolmaster Deluxe

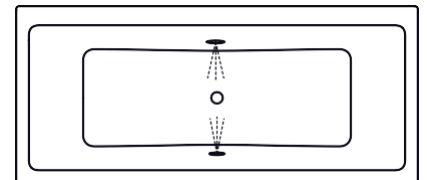

- On /off
- 2 injection jets
- Pump
- Suction grid

OPTIONAL:

- Axor bath tub rim combination
- Overflow/empty/walk-in
- Colour lighting RGB (2 spots)
- Bluetooth sound module

ACCESSORIES

- Handles
- Neck pillow

WHIRLPOOL BUILT-IN STATION

Have you purchased a bath other than a Cleopatra bath, but still want to enjoy a Cleopatra whirlpool system? Then it is possible, if a number of conditions are met, to deliver the bath to our installation centre. You can equip the bath according to your wishes by using the various options. Extra jets for foot or back jets, underwater lighting, pulsation are some examples of possible options.

The focus is always; we make the whirlpool the way you want it. We exclusively build whirlpool systems in sanitary acrylic baths. Ask about the possibilities in advance.

PROFESSIONAL USERS

Cleopatra markets a complete line of beautiful baths and whirlpools, developed to meet the high demands and specific wishes of professional users. As a professional user, the comfort, luxury and appearance of baths and whirlpools are important to you. You also place high demands on hygiene, ease of use, durability and efficiency.

You will find Cleopatra's products in various hotels, fitness centres, public saunas and holiday parks. For each customer, we design a tailor-made system to meet all requirements and wishes.

Contact us about the possibilities.

OPTIONS & ACCESSORIES

Extra Spa Jets

For whirlpools from the Comfort or Deluxe line, whirlpools in the spa system additional spa jets possible.

Here, installation of additional jets per two applies.

Extra Hydro Jets

Would you like two additional jets at the feet or in the back? The possible positions of additional hydro jets are indicated in the drawing for each bath.

Do note the maximum number of jets indicated for each bath.

Installation of additional jets applies per two pieces.

LED colour illumination 2 units

A highlight while relaxing in the bath. An atmospheric option surrounds your body with an exciting play of twinkling and colourful lights:

The colours purple, yellow, blue, red and green can be admired continuously or sequentially.

Bath oils

Specially developed for use in whirlpools, the skin-caring bath oils are gentle on your skin and do not affect the whirlpool system.

Available in the following scents:

Mediterranean
Cleopatra's
perfume Dried
wood Eucalyptus
Bergamot

Hydro bath heater

Hydro bath heating allows you to keep the bath water at a constant temperature. The heater runs evenly with the hydro controls.

Standard power is 1.5 kW.

Exception: 2 kW at Luxus Almeda, Spenida, Magadi and LoungePool 850.

Bath heater not possible:
→ separate bath
→ Spa system

Handle

The beautifully shaped handles help you get in and out more easily.

Neck pillow

Lay your head on this soft, comfortable pillow and the material will form around your head. The cushion is made of a waterproof foam (application depends on the model of bath).

Whirlpool cleaner

Specially developed for cleaning whirlpool systems.

OPTIONS & ACCESSORIES

Poolmaster One

The Poolmaster One is a flat control mounted on the bath rim. This control is standard with the Comfort systems and is easy to operate. It is possible to control the intensity of the air or water by holding the symbol down longer. Depending on the system and options chosen, the following functions are available: air, water, plus/minus and lighting.

Poolmaster Touch

The Smart Relax whirlpools use the Poolmaster Touch: a luxurious, extremely practical control made of glass. The control is designed for optimum ease of use and hygiene. The symbols on the control light up when subtly touched. Depending on the chosen system and options, the following functions are available: air, water, plus/min, pulsation, ⁰² micro bubbles and lighting.

Poolmaster Deluxe

Massage whirlpools use the Poolmaster Deluxe: a luxurious, highly practical digital control made of glass. The control is designed for optimum ease of use and hygiene. The symbols on the control light up when subtly touched. Depending on the system and options chosen, the following functions are available: air, water, plus/min, pulsation, ⁰² micro bubbles and illumination.

Operation LED lighting

The LED lighting option, for a bathtub without a system, comes with a round chrome control knob located on the entry side of the bathtub. This is controlled via a knob easy to operate, such as on/off, colour switching and fixing the colours red, green, blue, purple & yellow.

Taps & bathtub rim combination

The taps (fittings) on Cleopatra baths are by Axor, the brand of Hansgrohe, the top manufacturer of taps.

This pre-assembled bathtub rim thermostat with hand shower is available in the most common Axor versions and comes complete with:

- A thermostat Recessed
- hand shower Stop and
- diverter tap

See page 74 for more information on different colours of coatings.

Cleoplus

Luxury overflow & drain combination

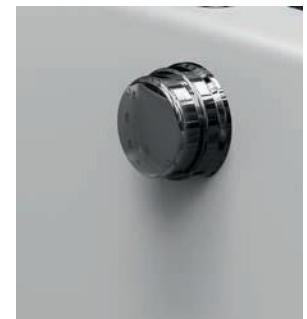

This overflow/empty combination comes standard with:

- All Cleopatra baths with whirlpool system
- All Luxus Line and LoungePool baths without system

The Cleoplus is also available as an **option** for baths without a system:

- Premium Line
- WellPool

Cleofill

Luxury overflow, drain & inlet combination

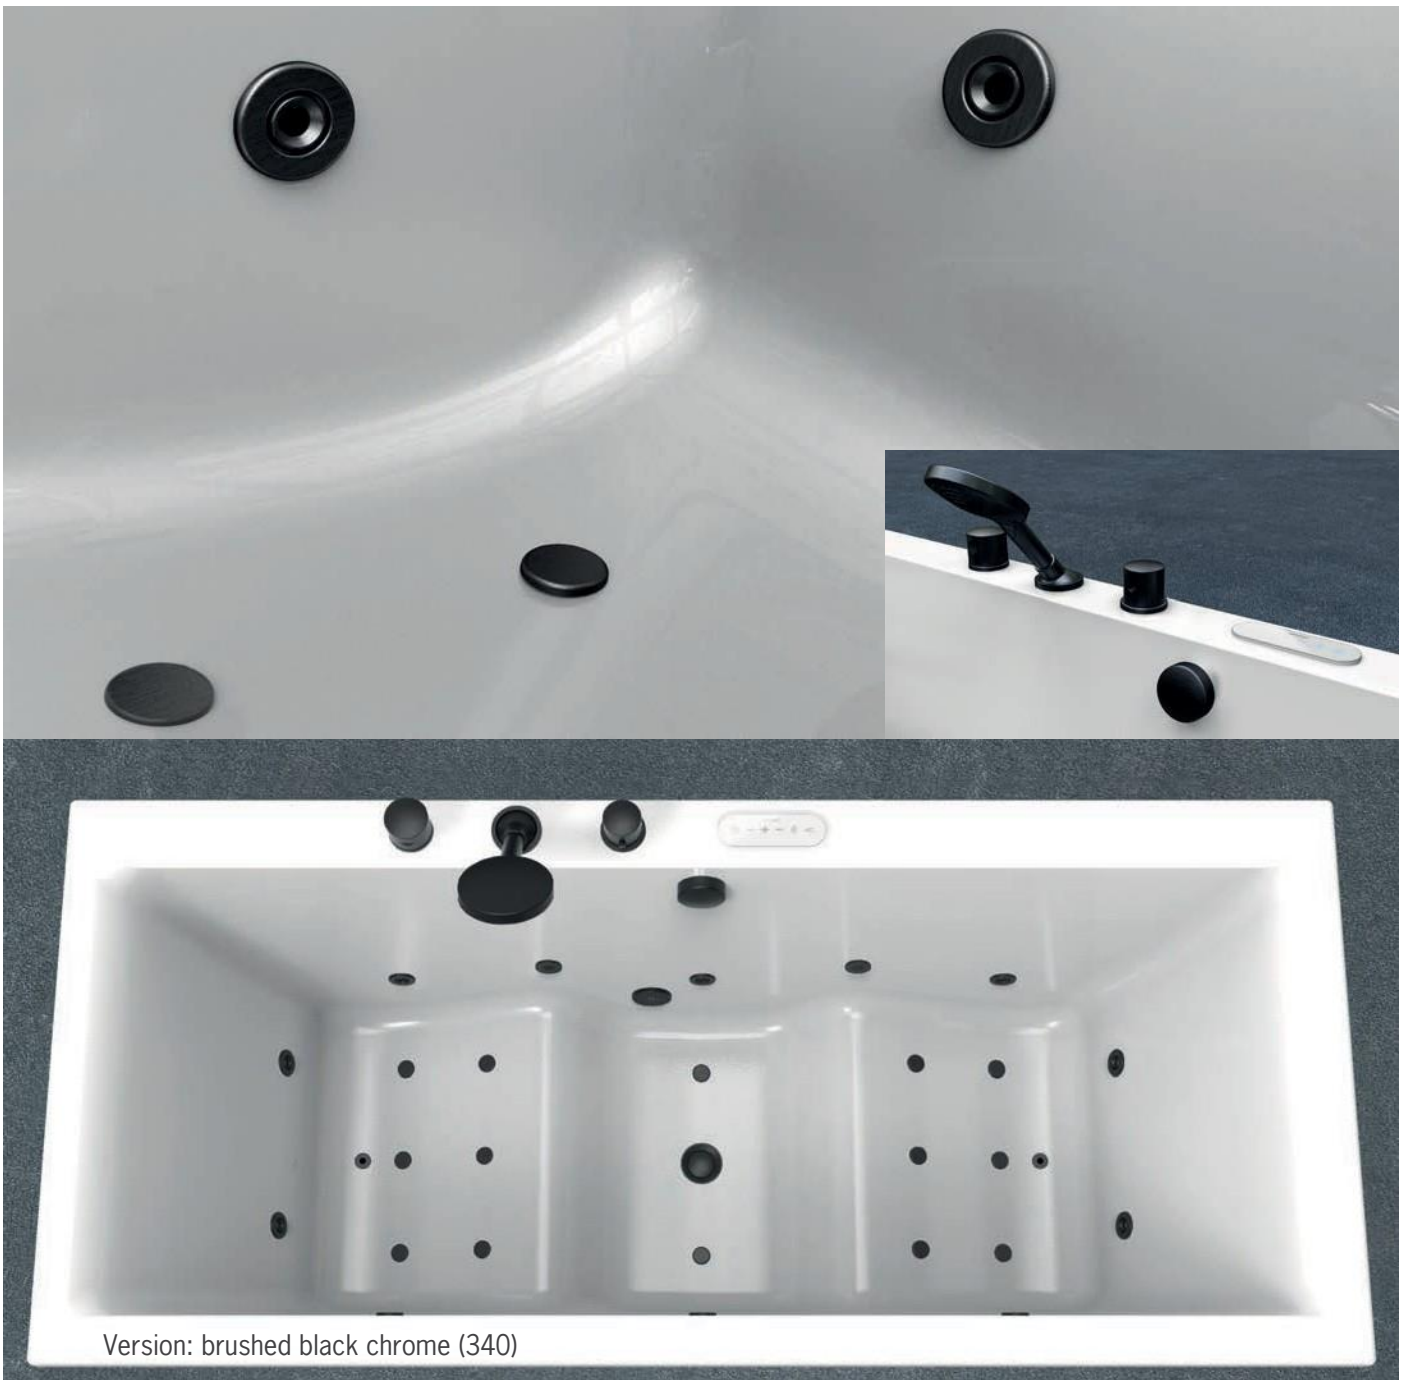

This overflow, drain and inlet combo comes standard with:

- All bath taps

Instead of a tap spout on the bath rim, you can opt for this bath filler combination. Here, the bath is filled via the overflow, which also acts as a walk-in combination and is also a drain combination.

SPECIAL FINISHES

Sometimes products and ranges need a small change to make the bathroom even more to your taste. With Cleopatra special finishes, we individualise our products according to the customer's personal wishes with an eye for detail. These can be surfaces in acrylic or specially coloured built-in parts for the bath or whirlpool. The special finishes are possible for every bath and whirlpool (with the exception of the freestanding baths).

COLOURS	ARTICLE NUMBER
Bath without whirlpool system with overflow/empty combination	83001810
Bath without whirlpool system with overflow/empty/withdrawal combination	83001815
Bath incl. spa system	83001820
Bath incl. Hydro system	83001830

Available in chrome as standard

Axor Starck hand shower 2 jet.

Available in chrome as standard

Eucalyptus
ESSENTIAL OIL

BATH OILS & WHIRLPOOL CLEANER

High-quality bath oils that are gentle on your skin and whirlpool system. The bottles are available in 250ml containers. Before use, always read the label for the correct dosage.

Available in the scents: Mediterranean, Cleopatra's perfume, Dried Wood, Bergamot, Eucalyptus.

Whirlpool Cleaner effectively cleans your whirlpool system. Depending on use, it is recommended to regularly flush your system with Cleaner after a bath. Possibly repeat this cycle if the system is heavily soiled. The use of foam, shampoo and oily bath oils increases the need for regular cleaning.

Acrylic Polish is intended to remove small scratches and imperfections from acrylic surfaces. Deep scratches and damage should be repaired by a specialist; please contact us.

TECHNICAL INFORMATION

NECESSARY TECHNICAL FACILITIES

Always read the manual before installation; the latest version can be found on the website: www.cleopatra.nl.

When installing a Cleopatra whirlpool, it is important that air can enter from a heated room to under the bath. For any service work, a service hatch (min. 500 x 500 mm) must be present at the level of the spa blower/pump. In addition, the 230 V electrical connection and water supply must comply with regulations.

Spa blower 800W
Hydro pump 1150W
Hydro heating 1500 / 2000W *
Oxylation 1350W

For a combined system, add up the capacities. Applying combined systems may result in an additional service hatch; get information about this.

*The larger capacities apply to baths with capacity > 400 litres.

GUARANTEE

All Cleopatra baths, whirlpools and taps come standard with a 2-year manufacturer's guarantee.

CLEOPATRA AND COLOUR

All baths and whirlpools are available in the usual sanitary colour: white. The fittings and visible parts are standard in chrome, optionally available in special finishes.

HYGIENE

Cleopatra whirlpools have two important features that provide maximum hygiene, without adding chemicals. The water hoses connected to the hydro jets empty and ensure that all the water drains out.

In addition, all water is automatically blown out of the air system after taking a bath (after-bath function).

We recommend taking a shower before using a whirlpool system. That way, less hair and dirt gets into the system.

USE BATH OILS & CLEANER

Cleopatra bath oils are specially developed for use in the bath and in combination with a whirlpool system.

You can clean the whirlpool system with the dedicated whirlpool cleaner. After a bath, you can add the cleaner to the bath and operate the system again.

FREESTANDING BATHS

Cleopatra freestanding baths are a jewel for every bathroom. Exclusive freestanding baths in seamless acrylic including overflow/empty combination. Quality, design and durability in 10 different bath shapes. Choose the model that best suits you and your bathroom.

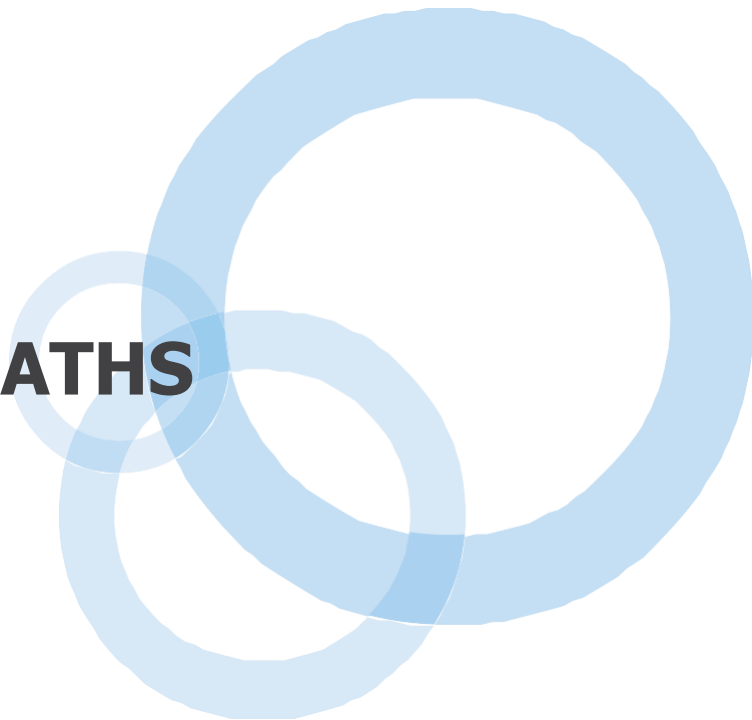

The freestanding baths are easy to install, are lightweight and easy to maintain.

WHIRLPOOL IN FREE-STANDING BATHTUB

If you opt for a freestanding bath, a whirlpool system is possible in the following baths:

- Ameland
- La Palma
- Tahiti
- Pelican
- Reunion
- Madeira

Given the limited space under the baths, it is possible to fit a Spa system. Here, air is blown into the bath from the bottom. The result is a continuous flow of many thousands of bubbles, large and small, massaging the body. The system is low-noise and easy to operate via an on/off button.

SPA MINI

OPERATION

On / off

INCLUDING

- Overflow/waste combination
- Spa afterblow

ACCESSORIES

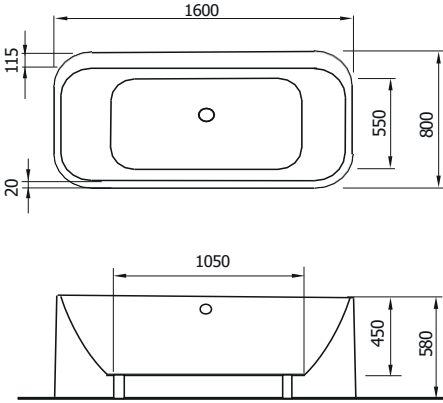

- Bath oils

TECHNICAL INFORMATION

NECESSARY TECHNICAL FACILITIES

When installing a Cleopatra freestanding bath, it is important to have a drain under the bath. This drain can be connected to the overflow/empty outlet of the bath by means of a flexible hose. For any service work, you can carefully lay the bath on one side.

GUARANTEE

All Cleopatra baths, whirlpools and taps come standard with a 2-year manufacturer's guarantee.

CLEOPATRA AND COLOUR

All baths and whirlpools are available in the usual sanitary colour: white. The fittings and visible parts are chrome as standard, unless otherwise specified.

HYGIENE

Cleopatra whirlpools have two important features that provide maximum hygiene, without adding chemicals. The water hoses connected to the hydro jets empty and ensure that all the water drains out. In addition, all the water is automatically blown out of the air and water system after taking a bath (Cleo Clean).

We recommend taking a shower before using a whirlpool system. That way, less hair and dirt will enter the system.

USE BATH OILS & CLEANER

Cleopatra bath oils are specially developed for use in the bath and in combination with a whirlpool system.

You can clean the whirlpool system with the dedicated whirlpool cleaner. After a bath, you can add the cleaner to the bath and run the system.

Cleopatra offers the perfect wellness experience for individual spaces. Smart solutions for a range of unforgettable moments of personal well-being and relaxation.

If you want more information about Cleopatra, visit our website www.cleopatra.nl or contact the Cleopatra branch or partner in your country.

Cleopatra

Cleopatra has been the Dutch manufacturer of luxury and high-quality wellness products since 1966. Our range consists of steam/shower cabins, customised steam solutions, baths, whirlpools, saunas, infrared cabins and spas. We serve both the consumer and the professional market. The most important source of inspiration for Cleopatra is water, whereby the consumer's need for relaxation comes first. In order to guarantee quality, all our products are manufactured in-house by professionals. In addition, we subject all manufactured products to an extensive and thorough quality test. With our passion for the product and years of experience, we guarantee the highest quality and durability of all Cleopatra products.

Showroom

To get a good impression of our products, a visit to our showroom and Wellness Experience Centre in Zaandam is highly recommended. Most of our range is conveniently presented here. Our experienced staff will be happy to advise you.

Wellness Experience Centre

Try out wellness products for the bathroom yourself. Shower, steam, sauna, infrared or bath, doesn't matter. Know the feeling of the sparkling water, the beauty of the flowing design, the invigorating scents of the steam room and the massaging power of the latest whirlpool system.

Customised advice

To get good advice, we also offer you the possibility of a Cleopatra wellness advisor working with you in your home to look at the options for the ideal interpretation of your wellness space, you can contact the inside sales department to make a consultation appointment.
