## FUNCTIONALITIES

The Wellness Shower can be connected to different brands of taps and showers. The various showers can be activated via the Shower Deluxe control. The number of showers determines how many users you need on the Wellness Shower. If you prefer a roof shower and side showers, one 4 users is sufficient. If you want to control several showers (hand, side and roof shower), then the 6 or 8 user is probably preferable. Make sure that the pressure and amount of water (flow rate) are known in advance and that the water management is set up accordingly. The Wellness Shower always requires a separate thermostatic valve.

### Warm up function

This function is for flushing the pipe system for 60 seconds, flushing the cold water in the pipes out of the pipe system.

### Fan

The fan is built into a tube and connected via the Wellness Shower control; this allows you to automatically control the condensation extraction via the display.

### Cold water

This feature provides instant cold water through one of the connected showers. This allows you to immediately enjoy a wonderful cold shower.

### Zone programmes

The zone programmes are pre-programmed and can be controlled via the display. Possible programmes

- Scottish exchange shower
- Tropical shower
- Cold water therapy shower

### Colour therapy

Lighting spots for in the roof or an LED strip for in the wall, a niche or under a bench. These lights are easy to operate via the Shower Deluxe controller. Automatic rotation of colours, dimming and white light mode.

### Sound module

Play your favourite music while in the shower. Simply connect via Bluetooth and then control volume, playback and track selection via the display. The speakers are waterproof and can be placed in the roof.

### Shower roof

In the shower roof, the various options can be fitted ex-factory. The roof can also be supplied in various RAL colours. The roof comes with finishing strips and assembly material.
